We develop the organizational and teamwork skills required to successfully design and build robots for the **FIRST® competition**. We perform with **joy, professionalism, and excellence**, sharing our **STEAM** knowledge with the larger community.

About Us

Harker Robotics is the FRC robotics team at The Harker Upper School.

We **design, manufacture, assemble, wire,** and **code** the robot ourselves, with designated teams for each part of the process.

We have **qualified for world champs** for the past two years, **winning our subdivision** at champs in 2018, and **finaling** at both our regionals in 2019.

Outreach

VEX and FLL

We organize middle school VEX & FIRST Lego League (FLL) programs at the Harker Middle School.

Wonderbots

We offer 8-week sessions of WonderBots, an introductory robotics class series, to middle school girls at local libraries.

Community Events

We demo our robot at various venues, including Maker Faire and AT&T Discovery Day, and we volunteer at service events like Toys for Tots.
